

Diploma in Marketing (880) – Purchasing & Supply Management

Prerequisites: Knowledge of business	Corequisites: A pass or higher in Certificate in
organisation	Business Studies or equivalence.

Aim: Businesses mainly focus on their core competencies and rely on suppliers for all other goods and services needed to satisfy customer demand. To enable this smooth transition and avoid replication effects, those in Purchasing & Supply businesses must closely manage their distribution and supply chain. This course offers candidates an opportunity to position themselves for jobs in the increasingly important fields of purchasing and supply management. The course include topics in accountability, international business, personal selling, marketing channels, purchasing strategy, sales forecasting, buyer behaviour, logistics, inventory and materials management. Through these variety of topics candidates specifically learn how to identify global sources for supply, establish logistics and support systems, maintain quality control, design vendor evaluation systems, and more. The qualification is intended to introduce candidates to the main skills and ideas involved in working in the purchasing and supply chain, and enable candidates to solve day-to-day problems and run routine operations. On completion of the course, candidates will understand: purchasing principles; selecting the right supplier; effective negotiation in purchasing and supply; managing inventory; the business environment for purchasing and supply; the integrated approach to planning, acquisition, flow and the distribution of goods from raw materials to finished products. Finding success in today's multi-dimensional workplace requires strong management skills. In the Purchasing and Supply Management program, candidates focus on the management function, building the skills and concepts necessary to develop into a successful manager.

Resources.

Supplementary Materials: Lecture notes and tutor extra reading recommendations.

Special Requirements: The course requires a combination of lectures, demonstrations and discussions.

discussions.		
Intended Learning Outcomes:	Assessment Criteria:	
1. Explore purchasing and supply	1.1 Outline logistic activities	
principles.	1.2 Analyse challenges facing purchasing and supply chain	
	1.3 Identify the role of supply management	
	1.4 Contrast supply management and return on investment	
	1.5 Distinguish operations management from supply chain management	
	1.6 Describe the determinants of supply and demand in a competitive market	
2. Outline the organisational structure of	2.1 Outline purchasing department activities	
the Purchasing Organisation.	2.2 Analyse factors affecting organisational structure	
	2.3 Distinguish operational vs strategic activities	
	2.4 Describe how a purchasing transaction is processed.	
3. Describe the processing of stock	3.1 Outline the steps in supply process	
transport order, standard purchase orders and	3.2 Analyse internal information flows	
request for quotation issued to the vendor and promotions and allocation tables.	3.3 Explore departments associated with purchasing and supply	

	3.4 Define demand management	
	3.5 Outline supply management tools, trends	3
	and tactics	
4. Define Enterprise Resource Planning (ERP) Systems.	4.1 Identify Electronic Data Interchange (EDI) benefits	
(ERI) Systems.	4.2 Understand the essence of ERP systems	
	4.3 Define eCommerce	
	4.4 Describe ERP software integrated facets	
	of development, manufacturing, sales	,
	and marketing.	
5. Describe how Total Quality Management	5.1 Define total quality management	
(TQM) philosophy satisfies the customer, the supplier, and continuously improve the business	5.2 Analyse quality management tools and methodology	
processes.	5.3 Explore specifications and standards in	
	supply management5.4 Describe quality management corporate	
	management approaches	
	5.5 Outline the queuing theory	
6. Define inventory. Describe the types of inventory.	6.1 Analyse forms and functions of inventory	
	6.2 Describe the economic order quantity	
	model 6.3 Define Materials Requirement Planning	
	(MRP) and Distribution Resource Planning (DRP)	
	6.4 Design statement of work	
	6.5 Describe functions of inventories	
	6.6 Identify costs of holding inventory	
	6.7 Describe stochastic modelling	
	6.8 Outline the production framework	
	6.9 Explore the selective inventory control methods.	
7. Describe transportation and delivery scheduling times (time duration) needed to carry	7.1 Identify issues facing the logistics industry	
out certain activities and dates that are calculated	7.2 Describe the transportation industry	
on the basis of these times	segments	
	7.3 Describe the relationship between supply	ÿ
	demand and logistics management	
8. Outline how cost benefit analysis	8.1 Describe price and cost analysis	
determines how well, or how poorly, a planned	8.2 Identify problems of using cost analysis	
action will turn out.	8.3 Explore cost benefit analysis positive factors and negative factors	
9. Discuss the concepts of supplier relationship management.	9.1 Demonstrate supplier contract and relationship management	
i ciadonsinp management.	9.2 Define contract management	
	9.3 Outline purchasing measurement guidelines	
	9.4 Describe supplier relations inputs and outputs	
	9.5 Describe advantages and disadvantages of single and multiple sourcing	
	9.6 Explore the market mechanisms and the	
	technological developments in the SRM	
	market.	

10. Explore equipment procurement procedures that enable significant cost-savings on equipment and supply costs.	10.1 10.2 10.3 10.4 10.5	Compare operating leasing and financial leasing Define total cost of ownership Analyse equipment purchasing problems Outline types of compensation agreement Describe the tender and procurement process.
11. Outline the purpose of ethics in purchasing and supplies.	11.1 11.2 11.3 11.4 11.5	Outline types of warranties Define ethics Outline principles and ethical standards Design a Supply Management Code of Ethics Explore how good ethical practice can enhance the organisation's integrity and reputation.
12. Describe how Global Supply Management (GSM) solutions enable enterprises to design, plan, execute, control, and monitor supply chain activities to create net value, build competitive infrastructure, leverage worldwide logistics, coordinate supply and demand, and measure performance globally.	12.1 12.2 12.3 12.4 12.5 12.6	Identify reasons for global purchasing Identify problems associated to global purchasing Design guidelines for dealing with international suppliers Define countertrade. Describe advantages and disadvantages Outline reasons organisations make instead of buying and vice versa Analyse supply strategy techniques
